I'm Final year student at Multimedia Nusantara University, majoring in Informatics. I am currently studying on software engineer with focus on Web Development. I'm also very interested in new things and love to learn about them. Wanting to learn more about technical and non-technical. Has good time management at work to keep up my healthy habit. I believe that software development is the epitome of creativity and innovation. I'm always excited to solve problems through programming and create tech solutions that can make a difference in the world.
